Serial No.

the Exe. Engr. was requested to investigate convenient sites & subt. estimate for the excavation of one or two deep wells, to afford the necessary water convenience for the temple & village

25. It will be seen from para 7 of the letter under disposal that sinking of wells was considered to be useless & that reversion to the old scheme of water-supply was decided upon.

26. ~~According to~~ the revised & revised estimate for Rs 25,017 has accordingly been subd. for sanction. Including the cost of materials available viz Rs 9,923, the entire cost of the revised estimate is Rs 34,940. By abandoning the estimate sanctd. for Rs 30,000, a loss of Rs 5000 was incurred, though the loss was then estimated at only Rs 1,500. As the executive Engr's project for Rs 53,530 has been reduced to 34,940, Govt. cannot be

WD 0561 - GPB- 3750—1 8 22

Serial No.

the ~~exceed~~ estimated cost will not be exceeded before the work is completed

27. The estimated cost of Rs 25,017 is proposed to be met in the proportion of 2/3 from the temple & 1/3 from State funds, as in the case of the estimate sanctd. originally. This means that a sum of Rs 8339 should be met from State funds placed at the disposal of the P. W. D and 16,678 from the temple funds. It has to be ascertained what amount is at the credit of the temple now and ~~how~~ what amount was actually placed at the disposal of the P. W. D when the original & revised estimates were sanctd. -

28. The points for consideration and orders are: —

1) The estimate for Rs 25,017 srcb. for sanction

2) Meeting the cost in the proportion of 2/3 from temple & 1/3 from State P. W. funds, as proposed

3) Information as regards the amount at the credit of[x] the temple & the amount already placed at the disposal of the P. W. D ~~for~~ previously. -

Subject:—

Project for water supply to Kalasa town in the Mudgere Taluk

—•—

77. The question of making efficient arrangement for the supply of water to Kalasa town,-the seat of the famous and richly endowed temple of Kalasesvara- in the Mudgere Taluk has long been under consideration of Government. An estimate for Rs.23,500-of which two-thirds was to be contributed from the temple funds and the balance met from the State grant- was sanctioned for the purpose in Government Order No. 1904-07/Inz. 120-07 dated 12th February 1916. After a portion of the work had been carried out, the project was abandoned under circumstances explained in Diwan Visvesvaraya's submission note dated 24th July 1918. as being costly and of doubtful utility: and the Chief Engineer was requested to investigate the question of sinking one or two wells to afford the necessary water convenience for the temple and the village. (Vide G.O. No.498/501-Inz. 153-18-2 dated 13th June 1919) The Superintending Engineer, Western Circle, having in his letter No. 943/E.E. (67 of 21) dated 22nd December 1920 to the Chief Engineer reported that there was no guarantee that, even if wells purposed to be sunk holding water in hot weather even if deepened to a depth of 20 feet and that the best solution of the question would be that of reverting to the old scheme of constructing a suitable tank near the town and leading water by pipes into a service reservoir etc., the Chief Engineer has, with his letter No. 12107 dated 3rd March 1925 sent up for sanction a revised estimate for Rs.34,940 for this work. Deducting the cost of materials available viz., Rs.9,923, the net amount now required for the purpose is Rs.25,017.

78.2 When the papers came up before me, I minuted that the estimate might be sanctioned, two-thirds of the cost being met from the funds at the credit of the Kalasa temple and the remaining one-third from State funds (as was done while sanctioning the first estimate in February 1916).

79 3. The question was, as directed by the Dewan, discussed at the meeting of the Council on the 23rd December 1925 and it was resolved that the estimate might be sanctioned and the allocation of expenditure as proposed might be approved, provision being made for the Government share in the P.W.D. budget next year.

80 4. The resolution of the Council may be graciously approved.

FIRST MEMBER OF COUNCIL.

31-12-1925.

Submitted to His Highness.

Bangalore.3

To

T. E. Jayarama Aiyar, Esq., B.A., B.L.,

Secretary to the Government of Mysore,

Muzrai Department, Bangalore.

Sir,

With reference to your letter No.2681/Muz.385-20-2 dated the 8th February 1921, re: the excavation of one or two wells for the water supply to Kalasa town, I have the honour to forward herewith, for information a copy of letter No.943/E.K.6.J.21 dated the 22nd December 1920, received from the Superinterding Engineer, Western Circle, on the subject.

2. An estimate for the work on the lines suggested by the Superintending Engineer is called for and the sare is awaited.

I have the honour to be,

Sir,

Your most obedient servant,

R V Sundaramma

FOR CHIEF ENGINEER OF MYSORE.

I.R.S./23-2/2.

Letter No.943/E.K.(6.J.21) 20th/22nd December 1920, from the Superintending Engineer, Western Circle, to the Chief Engineer of Mysore, Bangalore.

KALASA WATER SUPPLY.

Chief Engineer's No.b.3535 dated 6th October 1920.

I have the honour to report that I consider the project for wells thoroughly unsatisfactory. Kalasa lies on a ridge with the Bhadra on its north, west and south sides. There is no guarantee whatever that the proposed wells will hold water in the hot weather even if they are deepened to 10 feet - in fact it is more than ---- likely that they will run dry, as the natural tendency of wells --- situated on a narrow ridge and surrounded on three sides by a river is to lose all their water as soon as the saturation of the soil -- ceases after the monsoon.

2. The original project for a tank with a pipe line and stand-pipes was estimated to cost R. 34,000 odd. This work was undertaken by Mr.Reed of Mavinkere. His final bill amounted to R. 12,500 which --- included the collection of pipes and fittings, collection of stones and other materials and earth work to bund - which he started . The work was then stopped and the bund is left incomplete; all the ---- stone, jelly, gravel etc., collected at great expense are lying at the site of the work and the pipes and fittings have been stored in Kalasa.

3. In addition to the amount of R. 12,500 mentioned above, ----- Mr. Reed was paid R. 2,000 as compensation on account of the cancellation of his contract. Besides this, about R. 600 was expended on the acquisition of land, bringing the total to about R. 15,000.

4. Orders are recently received to cart the pipes and fittings to Shimoga. This will cost 1,500 but carts will not be available till March as they are all engaged in carting coffee to the coast.

5. Of the R. 12,500 mentioned in para 2 above, 9,500 represen

the value of pipes and fittings which is recoverable provided ---- R. 1,500 is incurred in carting them elsewhere. The net loss by - cancelling this scheme is therefore Rs 3,000 plus Rs 2,000 compensation or R. 5,000 in all.

6. I examined the scheme very carefully on the 11th and 12th and am convinced that the best solution is to partially revert to the old scheme by adhering to that source of supply with its pipe distribution. There is no need to go in for such an enormous --- elaborate bund as the population of Kalasa is only ₹ 500 and there is little chance of its increasing. The stream is a perennial -- one and there is no need for much storage. During the jatra ---- where 1,500 congregate, there is a certain amount of water in the wells still and the water supply scheme need not necessarily --- provide for this additional population.

7. The enclosed rough sketch illustrates what is proposed. The blue hatched portion shows the incomplete bund. The red line D.M. is a masonry dam from the bund to the high ground. R is a - storage tank of, say, 30,000 gallons. P is the pipe line to Kalasa. The masonry dam or wall/D.M. will be 12 feet in height and 60 feet in length. All material for this as well as for the storage ---- reservoir and pipe line are ready and the work can be completed in a couple of months at a cost of R' 3,000 over and above what has -- already been expended. This is the simplest and most economical solution and besides the supply is certain whereas the well scheme provides a very uncertain supply.

8. The Executive Engineer is asked to submit an estimate on -- these lines and the Chief Engineer's approval is solicited. The flow of the stream is also being gauged.

18.7.21

15.7.21

Letter No.1791/EK(6J-21) dated 6th June 1921, from the ----- Superintending Engineer, Western Circle, to the Chief Engineer of - Mysore. Bangalore.

KALASA WATER SUPPLY.

Chief Engineer's No.B.9055 dated 26th April 1921 forwarding copy of letter No.3505/Muz.385-20-4 dated 8th April 1921 from the Secretary to Government in the Muzrai Department, re: Kalasa Water Supply.

With reference to the above, I have the honour to state that I examined the scheme carefully again last week and have decided --- that the best solution is to revert to a scheme similar to that ---- originally sanctioned. The main features are as follows:-

(1) Constructing a small masonry dam 60' long higher up the ----- valley where it is narrow, thereby forming a little reservoir of 1,50,000 gallons capacity.

(2) To lay 1½ galvanised iron pipe line to Kalasa.

(3) To erect elevated tanks in Kalasa with a capacity of 5,000 gallons to be fed by gravity.

(4) To provide 3 stand pipes in the village at convenient places.

(5) To transfer the 6,000 feet of 3" pipes formerly purchased to some other water supply project.

I have selected the site for the dam. The stone and jelly for thi is ready nearby having been collected for the original scheme.

The Executive Engineer is asked to submit the modified ------ estimate as soon as possible.

Office of the Muzrai Commissioner in Mysore,
Dated, Bangalore, the 9th August 1923.

From

K. Chandy, Esquire, P.A.,
Muzrai Commissioner in Mysore,
Bangalore.

13 AUG 1923 MUZRAI

To

T.E. Jayarama Aiyar, Esq., B.A., B.L.,
Secretary to the Government of His Highness
the Maharaja of Mysore, Revenue Department,
Bangalore.

Sir,

With reference to the observations made by the Dewan in his notes of inspection of the Kadur District about the early completion of the water-supply scheme to Kalasa, I have the honor to state that it is learnt from some stray papers available in this office that a contribution of Rs.5,000/- was sanctioned from Kalasa temple funds (vide Government Order No.715-17/M.F.63-93 dated 17th February 1897) for the water-supply works at Kalasa and that gradually owing to the rise in the prices of materials and the expansion of the original scheme, a revised estimate for Rs.30,000/- was sanctioned by Government and that appreciable progress was also made in the execution of the work. When a re-revised estimate for a much larger amount was received from the Public Works Department, Mr. G. Aravamudu Iyengar, the late Muzrai Superintendent seems to have visited Kalasa in May 1918 and recommended the abandonment of the scheme on account of its prohibitive cost quite disproportionate to the number of people inhabiting the villages which were expected to be benefitted by the works. The Government seems to have accepted this view and ordered the cancellation of the sanctioned estimate and to have called for an alternative project for sinking some wells at convenient centres.

It is not understood whether a modified project as above was received and subsequently sanctioned by Government and what progress

..T.C.

progress has been made in the execution of the work.

2. I request you to be so good as to let me know whether any alternative project was sanctioned by Government and if so, to be favoured with a copy of the order together with a set of Government orders bearing on the subject for reference.

I have the honor to be,

~~Public Works Department~~, *Bangalore*

Dn 1440.
Muz.385-20-10.

To

K. V. Anantaraman, Esq., B.A.,
Secretary to Government,
Revenue Department,
Bangalore

SIR,

With reference to correspondence ending with your D.O.N Reminder 1075/Muz.385-20 dated the 20th January 1925, I have the honour to forward herewith an estimate amounting to Rs 25,017 for water supp to Kalasa Town for sanction of Government.

2. The scheme as now submitted is the cheapest possible, and is made up of the following works:-

		Rs
(1)	Constructing impound reservoir with weir and sluice:-	
	Bund .....Rs 3,800	
	Weir .....Rs 1,890	
	Sluice .....Rs 1,060	6,750
(2)	Delivery Main 4" C.I.	9,435
(3)	Distribution	11,678
(4)	Labour charges already paid	600
(5)	Land compensation and compensation for stoppage of work, already paid to Mr.Reed, contractor	2,800
(6)	Materials deteriorated	200
(7)	Carting charges of pipes	1,100
(8)	Establishment and Tools and Plant charges.....	2,377
	Total	34,940
	Deduct cost of materials available	9,923
	Net amount of estimate.....	25,017

3. In their order no.1904-7/Muz.120-07-30 dated the 12th February 1916, Government sanctioned an estimate for Rs 23,500, two thirds of the cost being met from the funds of Sri Kalaseswaraswami Temple and one third from State funds, placed at the disposal of the P.W.D. The work was then in charge of the Kadur Division. Mr.W.H.Reed, a local Coffee Planter took up the work on contract. The rates tendered by the contractor were higher than those sanctioned and a revised estimate for Rs 30,000 was sanctioned in G.O.No.2747-50/Muz.280-16-4 dated the 7th May 1917.

4. Before actually starting the work, the Executive Engineer, Kadur Division got detailed surveys made and since the detailed estimate came to nearly Rs 42,000, he reported that such a costly scheme for a small population of 300 to 400 was prohibitive. Thereupon it was ordered in 1917 that the work may be put in hand according to the sanctioned estimate of Rs 30,000.

5. The work was accordingly started and done to an extent of Rs 1,200 and 2½" cast iron pipes and other materials costing Rs 10,000 were collected. The Muzrai Commissioner visited Kalasa in May 1918. He reported that such a costly scheme was not justifiable for a resident population of less than 450. Government therefore ordered in their no.498-50/Muz.153-18-2 dated the 13th August 1918 that the project should be abandoned, and that a few wells should be sunk instead and that the materials &c., should be disposed of in consultation with the Muzrai Superintendent.

6. The work was immediately stopped and a compensation of Rs 2,000 paid to Mr.Reed the contractor. A portion of the pipes collected at Kalasa was carted to Chickmagalur.

7. An estimate for sinking two wells and improving the existing ones for Rs 10,848 was got up and submitted to the Superintending Engineer, Western Circle, in December 1920. The Superintending Engineer examined the scheme once again ~~and decided once again~~ and decided that the best solution would be to revert to a scheme similar to that

originally sanctioned in 1916. He accordingly instructed the Executive Engineer to prepare and submit a modified estimate.

8. In August 1924, the Executive Engineer Water Supply construction submitted a project for Rs 53,530. This was returned with a view to reduce cost as per my instructions by the omission of water tower, service reservoir, filters and the introduction of an ordinary pipe sluice to the impounding reservoir which are not considered necessary for this small scheme.

9. As ordered in G.O. of February 1916, two thirds of the cost may be met from the Temple Funds and one third from State Funds.

10. I request that you will be so good as to obtain early sanction of Government to the estimate for Rs 25,017.

I have the honour to be,

Sir,

Your most obedient servant,

2-3-25

Chief Engineer of Mysore.

SIR,

With reference to your letter No.1364/Muz.385-20-11 dated the 19th March 1925 re water supply to Kalasa Town, I have the honour to state that it is reported by the Executive Engineer, Kadur Division that a sum of Rs 20,000 being 2/3 of the sanctioned estimate amount was transferred to the credit of the P.W.Department as per G.O.No.2747-50/Muz.280-16-4 dated the 7th May 1917. When the work was ordered to be stopped, the final accounts of the contractor were made in August 1919, and the total expenditure up to that month was Rs 14,890-7-7. Two thirds of this amount, viz., Rs 9,926-15-8 was debited to contribution and the balance of Rs 10,073-0-4 was retransferred to the Civil Department in the accounts of the same month for credit to the Sri Kalaseswaraswami Temple funds.

It is also reported that materials valued at Rs5,256-2-0 were returned from the works to the stores and adjusted by debiting the full value to "Mis:Public Improvements" under Civil Works in the accounts for June 1921 and these materials are also available now in addition to those available at site of works.

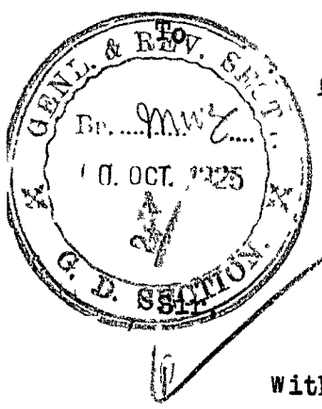
Muzrai Commissioner in Mysore,

Bangalore.

4 (9



To

B. Srinivasa Iyengar, Esq., B.A., B.L., Mur 385-20-20

Secretary to the Government of

His Highness the Maharaja of Mysore,

Revenue Department.

Sir,

With reference to your letter No.1620/M.F.385-20-17 dated 12th May 1925 and subsequent communications regarding the water supply to Kalasa town, I have the honor to forward herewith copy of the proceedings of a meeting of the temple Dharmadarsis held on 8th August 1925 received with the Deputy Commissioner's letter of the 8th September 1925 resolving that the vast difference between the temple accounts and those maintained in the Comptroller's Office require verification and that if there is not sufficient cash balance at the credit of the Sri Kalaseswaraswami temple, 6½% loan bonds necessary to make up the temple quota of contribution may be sold and the amount made available for -- the water works scheme.

2. The estimate as modified now amounts to Rs.34940-0-0 and deducting the net cost of the materials available, viz., Rs.9923-0-0, a sum of Rs.25017-0-0 will be required if the work is to be commenced ------- immediately. Two thirds of this cost will have to be contributed by the temple and the remaining one third from State Funds, as has already been ordered by Government. A sum of Rs.2377-0-0 is charged in the estimate towards establishment, tools and plant charges and as this is a contribution work, the provision has to be omitted. Thus a sum of Rs.15094/- will have to be contributed by the temple and the balance of Rs.7546/- from State Funds.

3. I am of opinion that it is rather unfair that 6½% loan bonds to the extent of Rs.12000/- yielding an annual int rest of Rs.750-0-0 to

the

the temple should be disposed of to provide funds for the water works scheme. This temple has contributed the largest amount, viz., ----- Rs.1,25,000/- towards the corpus of the General Muzrai Fund yielding an annual interest of Rs.4375-0-0. The temple has therefore a ---- legitimate claim upon the interest earnings of the Fund, when money is required for its own purposes urgently. According to the Comptroller's books the Fund had an opening balance of Rs.38954-15-11 at its credit on 1st July 1925 and a recommendation has already been made by me for a sum of Rs.25000/- out of this balance being invested in 6½% loan -- bonds. Deducting this amount, a sum of Rs.13954-15-11 and also the balance of the current year's interest earnings after meeting the --- budgetted grants, will be available for capital expenditure. I beg therefore to recommend that the amount required of the temple less the cash balance available at its credit may be contributed out of the -- accumulated interest earnings of the General Muzrai Fund.

4. The enclosures to your letter are returned.

I have the honor to be,

Sir,

Your most obedient servant,

for Muzrai Commissioner.

KSR.

Recd from Head Quarters 8/10/25

Letter No.1620/Muz.385-20-17 dated 12th May 1925 dated 12th May 925 from the Secretary to Government Revenue Department to the Muzrai ommissioner in Mysore.

I am directed to forward herewith the Chief Engineer's letter No.B.12197 in original (to be returned) with its enclosures, Submitting for sanction an estimate for Rs.25,017 for water,supply to Kalasa town and to state that it has been reported by the Comptroller that the balance at the credit of the temple at Kalasa at the end of February 1925 was Rs.3,358-7-9 in cash and Rs.44,489-4-9 in Government of India $3\frac{1}{2}$ per cent bonds and Rs.30,500/- in $Y\frac{1}{4}$ per cent State Loan Bonds of 1940).

2. . If the estimate is sanctioned, two-thirds share of the cost of it has to be met from the temple funds and to meet this charge the bonds belonging to the temple have to be sold, as the cash balance is small. I am to request you, therefore, to ascertain the views of the Dharmadarsis of the temple in the matter of selling the bonds to the extent necessary and forwarded the same early, with your opinion, for the orders of Government."

Government Order No. 1904-7—Muz. 120-07-30, dated the 12th February 1916, sanctioning an estimate for Rs. 23,500 for providing a good water-supply to the Kalasa Town.

2. Government Order No. 2747-50—Muz. 280-16-4, dated the 17th May 1917, sanctioning a revised estimate for Rs. 30,000 on account of rise in the prices of iron and other articles.

3. Government Order No. 498-50—Muz. 153-18-2, dated the 13th August 1918, directing that the project be abandoned and requesting the Chief Engineer to investigate the question of sinking one or two wells to afford the necessary water convenience to the village and temple.

4. Correspondence ending with letter No. B. 12197, dated the 3rd March 1925, from the Chief Engineer of Mysore, submitting for sanction a modified estimate for Rs. 25,017 for water-supply to Kalasa Town excluding the cost of materials available amounting to Rs. 9,923.

5. Letter No. 2007, dated the 2nd December 1925, from the Secretary, Public Works Department, stating that the estimate for Rs. 34,940 inclusive of the cost of materials available on the spot amounting to Rs. 9,923 is in order and that it may be sanctioned.

ORDER NO. 974-8—MUZ. 385-20-22, DATED 30TH JANUARY 1926.

The question of making efficient arrangement for the supply of water to Kalasa Town the seat of the famous and richly endowed temple of Kalaseswara in the Mudgere Taluk, has long been under consideration of Government. An estimate for Rs. 23,500, of which two-thirds was to be contributed from the temple funds and the balance from the State Funds, placed at the disposal of the Public Works Department, was sanctioned in the first of the orders read above. After a portion of the work, as per revised estimate sanctioned in the second of the orders read above, was carried out, the project was abandoned as being costly for a small place like Kalasa and also as being one of doubtful utility and the Chief Engineer was requested to investigate the question of sinking one or two wells to afford the necessary water convenience to the village and temple. The Superintending Engineer, Western Circle, having in his letter No. 943—E. K. (67-21), dated 22nd December 1920, to the Chief Engineer reported that there was no guarantee whatever of the wells proposed to be sunk holding water in hot weather even if deepened to a depth of 20 feet and that the best solution of the question would be to revert to the old scheme of constructing a suitable tank near the town and leading water through pipes into a service reservoir, etc., the Chief Engineer has after necessary further investigation sent up for sanction fresh estimate for Rs. 34,940. Deducting the cost of materials available, *viz.*, Rs. 9,923, the net amount now required for the purpose is Rs. 25,017.

2. In view of the circumstances above set forth, Government are pleased to sanction the modified estimate for Rs. 34,940 inclusive of the cost of materials available, two-thirds of the cost being met from the funds at the credit of the temple and the remaining one-third from State Funds. The work may be started with the contribution payable from the temple funds and necessary provision made for the Government share in the Public Works Department budget next year.

3. The Chief Engineer is requested to have the work taken up at once and to submit to Government in the Muzrai Department a quarterly report of progress made in the execution of the work, the report for each quarter (commencing from 31st March 1926) being submitted before the 15th of the following month.

4. The Comptroller is requested to arrange for the sale of such portion of the loan bonds of the temple as may be necessary to supplement the cash balance at the credit of the temple for meeting its share of the cost of the project and submit a report of the fact to Government for their information.

B. SRINIVASA IYENGAR,
Secretary to Government,
Revenue Department.

To—The Secretary, Public Works Department.
The Chief Engineer of Mysore, with the sanctioned estimate and other enclosures.
The Muzrai Commissioner in Mysore, with a copy of the abstract estimate.
The Comptroller to Government, through the Financial Secretariat.
The Deputy Commissioner, Kadur District, with a copy of the abstract estimate.
